Response to Amendment

The amendment filed 11-18-05 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows. In line 13 of claim 1, a fourth electrode and details thereof. A similar situation also appears in claim 9. Applicant is required to cancel the new matter in the reply to this Office Action.

Drawings

The drawings are objected for following reasons. The drawings must show every feature of the invention specified in the claims (see 37 CFR 1.83a). The claimed fourth electrode and details thereof must be either shown in the drawings or cancelled from the claim. No new matter should be entered. Applicant is required to submit a proposed drawing correction, showing changes in red ink, in response to this Office action. However, formal correction of the noted defect(s) can be deferred until the application is allowed by the examiner (see MPEP 608.02v).

Claim Rejections - 35 USC § 112

Claims 1, 4, 9, and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Please, see objection to the amendment above.

Claims 1, 4, 9, and 10 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In line 13 of claim 1, applicant claims "a fourth electrode" (transparent electrode) provided "on a boundary between the electrodes which are cathodes and the organic EL layer". From reading the specification and viewing drawings, the specific location that applicant is attempting to claim is not clear at all. In figures, where exactly is this fourth electrode? In figures and in specification, where exactly is "a boundary" claimed by the applicant? Note, a similar situation also appears in claim 9.

Regarding claims 1, 4, 9, and 10, claims 1, 4, 9, and 10 are informal (see rejection of claims under 35 USC 112, second paragraph) that no meaningful examination can be undertaken at this time. See MPEP 702.01.
